

## **Information for Patients for children aged 7-10 years**

In preparation of a verbal explanation delivered by the attending physician.  
NPC-2016 Registry

Dear \_\_\_\_\_,

You are sick and have to come to the hospital more often. That's because you have a tumour in your body that does not belong there. Not many children have that kind of tumour in their body. Therefore, many doctors in Germany and around the world are working together to better understand these kinds of tumours and to help you and other children with this tumour.

The doctors want to collect as much and as accurate information as possible about children who have a tumour of this kind. This will help us better understand why the children have this kind of a tumour, how to recognize it and how to make the children healthy again. The doctors also want to keep a small piece of your tumour, some blood and throat washings from you and also examine your body. You won't get any extra shots because of that.

We would be pleased if you want to participate and by doing so help other children. If you don't want to, that's fine.

You can take some time to think about it and talk to your parents or doctors about it. If you have any questions, just ask your doctor.

He or she will help you for sure.

Thank you!
