Vertebral artery injuries following cervical spine trauma: a prospective observational study.

Randomized controlled trial of 2.5-cm versus 3.5-cm mesial temporal resection in temporal lobe epilepsy-part 1: intent-to-treat analysis.

Randomized controlled trial of 2.5-cm versus 3.5-cm mesial temporal resection-part 2: volumetric resection extent and subgroup analyses.
Acta Neurochir. 153:221-8, 2011

Mueller CA, Roesseler L, Podlogar M, Kovacs A, Kristof RA.
Accuracy and complications of transpedicular C2 screw placement without the use of spinal navigation.
Eur Spine J 19: 809-814, 2010

Comparison of ventral corpectomy and plate-screw-instrumented fusion with dorsal laminectomy and rod-screw-instrumented fusion form treatment of at least two vertebral-level spondylotic cervical myelopathy.
Eur Spine J 18:1951-6, 2009

Shrinkage of the hippocampal remnant after surgery for temporal lobe epilepsy: Impact on seizure and neuropsychological outcomes.
Epilepsy Behav 14 379--386, 2009

Experimental strategies to promote spinal cord regeneration - an integrative perspective.  

Mueller CA, Schluesener HJ, Conrad S, Pietsch T, Schwab JM.  
Spinal cord injury--induced expression of the immuneregulatory chemokine interleukin-16 caused by activated microglia/macrophages and CD8+ cells.  

Spinal Cord Injury Induces Lesional Expression of the Proinflammatory and Antiangiogenic Cytokine EMAP II  
J Neurotrauma 20: 1007-1015. 2003

Lesional expression of a proinflammatoy and antiangiogenic cytokine EMAP II confined to endothelium and microglia/macrophages during secondary damage following experimental traumatic brain injury.
